

Carbon Reduction Plan

Supplier name: LA International Computer Consultants Limited

Publication date: 1st November 2022

Commitment to achieving Net Zero

LA International is committed to achieving Net Zero emissions by 2050.

Baseline Emissions Footprint

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured.

Baseline Year: 1st July 2020 – 31st June 2021	
Additional Details relating to the Baseline Emissions calculations.	
LA International's site does not use gas and there were no F-gas leaks during the reporting period, hence Scope 1 emissions totalled zero.	
LA International will review the baseline for future reporting periods to take account of changes in operations going forward.	
The Scope 3 total includes upstream transportation & distribution, generated waste & employee commuting.	
LA International's internal audit determined that emissions resulting from business travel (purchased travel) and downstream transportation & distribution were zero.	
Baseline year emissions:	
EMISSIONS	TOTAL (tCO₂e)
Scope 1	0.00
Scope 2	55.96
Scope 3 (Included Sources)	8.58 (upstream transportation & distribution, downstream transportation & distribution, business travel, generated waste and employee commuting)
Total Emissions	64.53

Current Emissions Reporting

Reporting Year: 1st July 2021 – 31st June 2022	
EMISSIONS	TOTAL (tCO ₂ e)
Scope 1	0.00
Scope 2	69.30
Scope 3 (Included Sources)	17.05 Waste - 0.41 Employee commuting - 16.56 Purchasing - 0.08 Upstream 0.0 Downstream 0.0
Total Emissions	86.35

Emissions reduction targets

In order to continue our progress to achieving Net Zero, we have adopted the following carbon reduction targets.

As our baseline was established during periods when our offices were closed for significant periods of time due to Covid-19 lockdowns, our carbon emissions have since increased due to additional energy consumption and staff commuting upon return to our offices under a hybrid working model.

Therefore, we have realigned our targets, and project that carbon emissions will decrease over the next five years to 70.35 tCO₂e by 2027. This is a reduction of 18.6%.

Calculated as straight line reductions, this can be seen in the graph below:

Carbon Reduction Projects

Completed Carbon Reduction Initiatives

The following environmental management measures and projects have been completed or implemented since the baseline year.

- Transition conventional fuel vehicles to hybrid and/or electric models
- Installation of full LED lighting within all offices
- Increased utilisation of online meetings to reduce business travel where applicable
- Transition to laptops/tablets over desktops

In the future we hope to implement further measures such as:

- Transition all fleet vehicles to electric vehicles
- Install PIR controlled lighting where sensible
- Improve building insulation
- Conduct an out of hours energy survey to identify energy waste
- Continue staff engagement around energy saving behaviours e.g. avoid opening of windows when AC is active etc.
- Investigate the feasibility of installing solar PV and other renewable technologies such as air source/ground source heat pumps
- Investigate the potential of expanding the air-conditioning 'dead zone'

Declaration and Sign Off

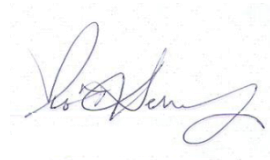

This Carbon Reduction Plan has been completed in accordance with PPN 06/21 and associated guidance and reporting standard for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard and uses the appropriate Government emission conversion factors for greenhouse gas company reporting.

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements, and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard.

This Carbon Reduction Plan has been reviewed and signed off by the board of directors

Signed on behalf of the Supplier:

A handwritten signature in black ink, appearing to read 'Scott Henry', is written over a light blue dotted grid background.
